FOR NEW ZEALAND

FORMULATED FOR TOTAL PEST CONTROL.

CIMETROL SUPER EW is the next generation of combination insecticides that contain four actives, one of them is an IGR which will give you long lasting residual control.

PRODUCT SPOTLIGHT

CIMETROL SUPER EW

Formulated as an oil-in-water emulsion, our award winning Cimetro Super EW allows rapid access of the active ingredient to the target pest while providing long lasting residual control.

This advanced formulation has multi-action properties containing a Type I pyrethroid for fast flushing and knockdown, a Type II pyrethroid for rapid kill of the insects, a metabolic synergist to bypass insect metabolic resistances, and an Insect Growth Regulator (IGR), demonstrating a completely different mode of action, to ensure that any stubborn populations never get to pass their resistant properties onto the next generation.

The advanced formulation will control bedbugs, fleas, cockroaches, beetles, (and their larvae), flies, mosquitoes, moths (and their larvae), and wasps.
500ml auto-dose bottle - up to 20 x 5 litre treatments per bottle.

German cockroach control at a zoo in the UK with Cimetro Super EW.

The label allows for indoor use only for all domestic, commercial and industrial premises including kitchens, hotels, dormitories and sleeping areas, hospitals (excluding occupied wards), military establishments, cruise ships and food storage/processing areas.

EPA Approval Number: HSR101412.
AsureQuality Approved Cat B : H4354.
MPI Approved Type B (All animal product except dairy).
